

Criteria for evaluating the quality of a scientific article

<p>Author Is he/she authority in the field? Which academic institution does he/she work for?</p>	
<p>Editor and journal Is it generalist or specialized? Is the article published with peer review?</p>	
<p>Publication date Is the information current? Are the data and method still current?</p>	
<p>Bibliographic references Are they numerous and varied? Are they clear and complete?</p>	
<p>Structure and style Are the language and style nuanced? Do they seem objective?</p>
